SKILLS

- Java, Spring Boot, Redis, Spring MVC, Spring JPA, Payment Gateway, MySQL, Git, AWS, Docker, Maven, Data Structures and Algorithms, RESTful APIs, Microservices, Design Patterns, System Design

EXPERIENCE

Software Development Engineer 2 (Backend)

Sep 2024 - Present

Rocket Software

Content Automation – Low-Code/No-Code Studio Platform

- Revamped existing backend and UI architecture, modernizing the codebase and developing RESTful APIs to support dynamic UI controls.
- Migrated the codebase from Java 11 to Java 17 and redesigned legacy code-generation by introducing an enriched .json-based approach.
- Replaced file system storage with a database-backed solution, improving file handling performance and reliability.
- Enabled Kubernetes deployment with Helm and implemented k3d-based all-in-one deployment setup for multi-service environments.
- Integrated a smart chatbot assistant to support non-technical users, while contributing to Agile ceremonies, code reviews, and issue resolution.
- **Key Technologies:** Java, Spring Boot, Hibernate, Docker, Kubernetes (Helm, k3d), Redis, Microservices

Programmer Analyst

Jan 2022 - Sep 2024

Cognizant

Max Life Insurance Project

- Designed and developed Spring Boot based RESTful APIs for seamless communication between frontend and backend of Insurance platform.
- Improved API performance by 40% using efficient paging, Redis caching, and reduced database operations.
- Developed robust error handling mechanisms to manage API exceptions and ensure data integrity.
- **Key Technologies:** Java, Spring Boot, Hibernate, Redis, Docker, Microservices

PROJECTS

Care Sync

🔗 <https://github.com/Thomas1782k/CareSync>

- Implemented a Doctor appointment scheduling application using Java, Spring Boot, following MVC architecture
- Orchestrated Redis caching and Docker integration, reducing response times by 25% and database load by 40%.
- Optimized infrastructure with paging and secure authentication, reducing search query response time by 30%.
- Integrated Stripe Payment Gateway for enhanced transaction security and user experience.

URL Sharpener

🔗 <https://github.com/Thomas1782k/URLSharpener>

- Engineered a full-stack application using React and Spring Boot, improving URL storage efficiency by 75%.
- Optimized performance, achieving a 50% reduction in response times.
- Refactored the Spring Boot application architecture and enhanced maintainability.

ACHIEVEMENTS

- **2022** - Gold Medalist and recipient of the Shri B. Subramanian Award for Best Outgoing student.
- **2018** - Guinness World Record holder for the Largest Human Image of a Video Game Controller.

EDUCATION

karpagam college of engineering

2022

BE/B.Tech/BS

BE in Electronics and Instrumentation Engineering | 9.0 CGPA
